

Multi-Sensory Room

Our Multi-Sensory Room was made possible by grants from Ronald McDonald House Charities, AbbVie, and JPMorgan Chase.

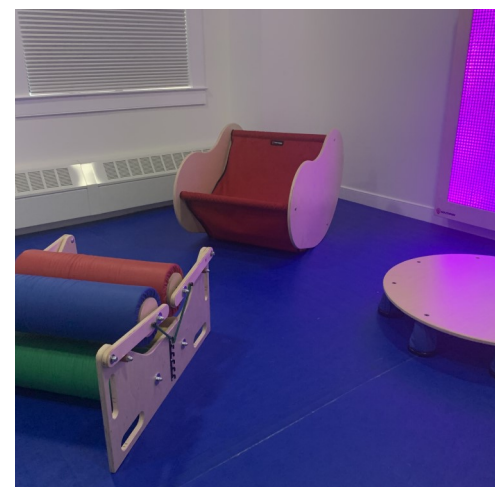

The room contains **both relaxing and stimulating equipment** for guests with **sensory processing needs**. A volunteer or staff member will orient families to the room, which can be accessed with a key 24/7.

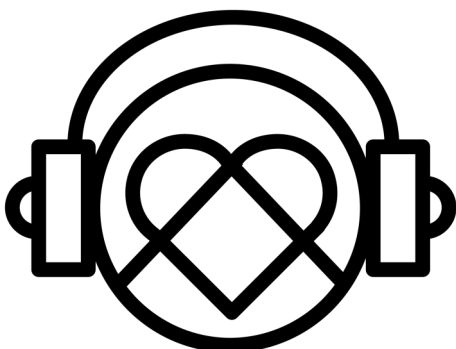

Fiber optic lighting and tunnel allows a *visual and tactile* experience. The Star Gazer will project stars onto the wall for a *quiet, calming* environment.

LED Bubble Tubes provide a *vibratory relaxation* and *visual sensory* experience.

The room also has **equipment for jumping, rocking, and sliding** through massaging rollers.

The Ronald McDonald House of Delaware's Multi-Sensory Support Program is soon to be certified as a Sensory Inclusive Environment through KultureCity.

Part of the certification includes training staff to become certified in Sensory Inclusion.
